 - **Mute**
When scene mode is set as mute, standby screen will show the icon.

 - **Earphone mode**
When normal wired earphone connects with the phone, standby mode will show the icon.

Preparation before use

Installing the SIM card

The Subscriber Identity Module (SIM) card identifies you to the mobile network. Your phone will not fully work without the SIM card.

- Remove the battery cover by pushing it downwards.
- Insert the SIM card into the slot with the copper contacts facing down and the cut corner on the rear end.
- To remove an already-installed SIM card, pull the SIM card gently using your thumb.

Installing the battery

Insert the battery. Make sure that the terminals on the battery align with the metal contacts on the phone. Replace the battery cover. Push it upward until it locks into place.

Charging the battery

- Connect the AC adapter plug to an electrical outlet and connect the other end to the USB port at lower side of the phone.
- When the power comes on, "Charging..." will be displayed on the LCD screen, and the charge indicator will start to scroll. It will only stop after the battery comes to full charge.
- If a battery is completely discharged, it may take a few minutes before the charge indicator appears on the LCD screen.
- To fully charge when the phone is discharged, keep charging for at least three hours.
- After the battery charge comes to full, disconnect the charger from phone and the socket of the alternating current.
- Do not take out the battery while it is being charged. Personal data and settings in your phone and SIM card might be lost when you take out the battery.

Power ON/OFF

Press and hold  for about 3 seconds to turn on or power off your phone.

Security number

PIN (Personal Identity Number), is usually provided to a SIM card by the network operator. If you enter a wrong PIN three times in a row, it will be locked. You need to enter your PUK (Personal Unblocking Key) number to unlock. Please contact your SIM network operator for more details.

PUK (Personal Unblocking Key) is used to unblock the PIN. PUK code is provided to a SIM card. If you lose or forget the password, call your network operator.

General features

Make a call by dialing

- Dial the number** In standby mode, enter a phone number and press  *Option*, select *Dial* and  *Accept* to dial out the number. If you happen to enter wrong digit, press  to delete it.
- Dial from contacts** In standby mode, press  to display the phonebook list. Browse the number you want to call and then press  *Option*, select *Dial* and press  *Accept* to dial the selected contact.
- Dial from the call list** Press  in standby mode. The call lists will be displayed. Select Outgoing, Incoming or Missed calls and press  *Accept*.
- Brows to the number you want to call press  *Option*, select *Dial* and press  *Accept* to dial the selected contact.
- Speed dial** To make a Speed dial call; In standby mode, press and hold the corresponding Speed dial key. You could also press the Speed dial key and then press  *Accept* to dial.

Answer a call

When a call comes in, the phone will ring and/or vibrate according to your profile setting. It will show the caller's name if the network supports it. The caller's name display depends on whether you have saved it in your phonebook. Press  *Accept* to answer.

In call options:

- Turn on the Handsfree mode** Press Handsfree key to turn on the speakerphone. Press Handsfree key again to return to normal talk mode.
- Mute a call** Press  *Options*, down to *Mute* and press  *Accept* to mute the call. Do the same way to unmute the call later.

Options when receiving a call:

- Turn off the Ringer** Press  *Mute* to turn off the ringer.
- Reject a call** Press  *End* again to reject the call.

General features

To end a call conversation

When you have finished talking, press  *End* to end a call. You can also press  *End* if you want to terminate a call after you dialed.

To make an international call

To make an international call, press [*] key repeatedly until a "+" sign appears on the screen. Enter the country code, area code (without the first zero), and the phone number: For example; Enter 49 for Germany, 44 for UK, 86 for China. Enter +8612345678910, when making an international call to China.

Adjusting the call volume

During a phone conversation, press  or  key to adjust the volume of the earpiece.

Keypad lock

The Keypad lock function prevents an accidental pressing of keys that causes unnecessary operation of your phone. In standby mode, slide the *Keypad lock* switch upwards to lock the keypad. Slide it downward to unlock.

Torch light

At any user mode, slide the *Torch switch* upward to turn on the light. Slide the switch downward to turn off.

Phone functions in standby mode

With phone in standby mode, you can access the following functions:

- Phone Menu** Press  to open the phone home menu. Press  or  key to browse the list.
- Contacts** Press  to access the phonebook entries.
- Call lists** Press  to display the call lists.
- Write message** Press  to access the write message home.
- Emergency call** Press and hold *SOS* key to activate the Emergency alarm, the phone will emit an alarm tone, sends the SMS alert and make a call to the programmed Alarm number/s.

Note: You need to setup the Emergency call numbers in memory before using this function, see Emergency> Alarm number setting page of the user manual.

In standby mode, press  or press  and then select *Phonebook* to view the contact list in your phonebook.

Adding new contact

Add a new contact to the Phone or SIM memory.

- 1 In the Phonebook list home, press  *Option* and browse to *Add contact*, and press  *Accept*.
- 2 Select the memory location; *Save to SIM* or *Save to ME* and press  *Accept*.
- 3 Press  *Edit* and then input the name. Press  *Accept* to confirm.
- 4 Browse down to number. Press  *Edit* and input the number, then press  *Accept* to confirm.
- 5 The record has been stored to your contact list. Press  *Back* to return to the Phone book or stand by mode.

To program the Speed dial numbers

- 1 In the Phonebook list home, press  *Option* and scroll down to *Advanced* and press  *Accept*.
- 2 Select *Speed dial* and press  *Accept*.
- 3 Select a Speed dial key location 2~9, *, or # key and press  *Accept*.
- 4 Select *Set/Change* and press  *Accept*.
- 6 Browse the phonebook record you wish to assign and then press  *Accept* to save. Press  *Back* to return to the Phone book or stand by mode.

To make a Speed dial call; In standby mode, press and hold the corresponding Speed dial key. You could also press the Speed dial key and then press  *Accept* to dial.

Quick search

In the Phonebook list home, press a letter key (A~Z) that corresponds to the first letter of a name, and the display screen will jump to the first entry beginning with that letter.

Phonebook list

In the Phonebook list home, press  or  key to scroll through the list. Press  *Option* to do the following;

Dial	To call the selected contact
Detail/ Edit	To display the name and the number of the contact. On the display, press  <i>Option</i> to <i>Edit</i> , <i>Send message</i> , or <i>Call</i> the selected contact.

When the phone automatically turns off or indicates the alarm information of power shortage, please charge the battery in time.

For the first few times, please fully charge the battery before using the phone.

When not in use, please separate the battery with power supply. Overcharging will shorten the life of the battery.

Do not expose your products to extreme high or low temperatures. Do not expose the battery to temperature above +40 °C.

Do not use damaged battery.

Do not expose your mobile phone to direct sunlight or in hot areas. High temperatures can shorten the life of electronic devices.

Do not expose the battery into fire or throw it away. Return the worn-out battery to the provider or put it in the appointed recycle place. Do not throw it in familial rubbish.
